

## Nearly Cleaned

Less Than  
The Best

VS.

## Properly Cleaned

"The Best  
Beer In Town"

The beer in a "Nearly Clean" glass is easy to spot... it's less than the best. The head contains large, coarse bubbles (fish eyes) and rapidly goes flat... it has bubbles sticking to the sides of the glass... foam doesn't stick to the glass as you drink it... you end up having to fill the glass to the top... no eye appeal and poor taste.

The "best" beer is both visually and tastefully appealing. It starts with a good, solid head of foam... one that lasts... the foam clings to the side of the glass as each drink is taken. It has absolutely no bubbles sticking to the side of the glass. It's a beer that looks as good as it tastes. The better the beer looks, the more glasses you'll sell.

### Do your own analysis (use the chart above)

## Glass Cleaner

Regular and Low Suds. Regular for manual brush washing. Low Suds for electric brushes. The first tank contains hot or cold water and the Glass Cleaner.

- ▶ Concentrated for quick cleaning.
- ▶ Contains no petroleum or fat-based detergents that could leave an invisible, oily film.
- ▶ Gives you a properly cleaned glass and ensures effective sanitization.

Note: For a Two-Tank system use the same instructions without a second tank clear water rinse.

## Sanitizer

The third tank contains hot or cold water plus the Sanitizer. This is the final rinse and sanitization process.

- ▶ Contains trichloromelamine (TCM) for effective sanitization of all bar glassware.
- ▶ Laboratory tested — Effective against E. coli and Staph a.
- ▶ No residual film or unpleasant odor.

## Mineral Solvent

Is used in the first and third tank as a “booster” in the water softening process. Add, if needed, to the first and third sinks after establishing the correct amount to be used, based on local water hardness conditions.

## Pouch Packs

- ▶ Beer Clean® products are available in easy-to-use pouch packs.
- ▶ Pre-measured, moisture-proof envelopes ensure exact dilution for each application.
- ▶ Color coded for instant identification. Simply open envelope and empty entire contents into tank.
- ▶ Portion control eliminates excessive usage and waste.
- ▶ Simplifies handling and storage.
- ▶ One application per pouch.

## Bulk Containers

- ▶ Beer Clean® products come in economical bulk packs.
- ▶ Durable plastic jars with easy seal lids.
- ▶ Wide mouth opening for easy dispensing.
- ▶ Complete with measuring spoon to ensure proper mixing.

**Call your distributor today and ask for BEER CLEAN® products. Accept no substitutes.**
